THE CONDITION MONITORING PROFESSIONALS!

INFRARED THERMOGRAPHY INSPECTIONS

Regular inspections of equipment using infrared thermography can find problems early, before they find you.. Areas that should be inspected include:

- **Motor Control Centers.**
- **Outdoor substations and switchyards.**
- **Transformers.**
- **Overhead feeders.**
- **Bearings and couplings.**
- **Furnaces.**
- **Roofs and building enclosures.**
- **Steam lines.**

Other benefits:

- **All data archived in a computerized database for future comparisons.**
- **Inspections performed by OEM certified Switchgear Specialists.**
- **All activities overseen by a licensed professional engineer with over 20 years of vibration experience in industry and the military.**
